

## Farther and Faster

### Baker Rauch & Lang Electrics

More mileage than ever—a quicker getaway—when ever extra speed and dash are wanted—and an EXACT foreknowledge of actual performance.

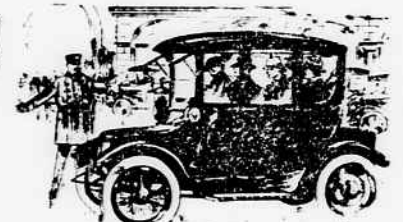

All this is offered in Baker Rauch & Lang Electrics—made possible by a new, snappy, high-speed motor, in combination with a new instrument which indicates the exact condition of the battery—tells the mileage still available and insures the battery being fully charged and completely discharged—an accurate knowledge of power conditions and mileage available ALL the time.

Each characteristic of body, design and prestige so exclusively "Baker Rauch & Lang" is retained.

The superb quality of the Baker Rauch & Lang coach work and expert engineering will never diminish. It is through this knowledge that the Baker Rauch & Lang has been accorded first place among the automobiles of Fashion.

Style with utility—utility with convenience—convenience with simplicity—simplicity with safety—safety with added mileage and known performance these unite in maintaining for the Baker Rauch & Lang the prestige won through sixty-four years of quality achievement.

## NEW ROAD EXPECTED ALONG THE POTOMAC

Will Probably Be Constructed Between La Plata and Riverside, Md., in Near Future.

It is expected that within the near future a road will be constructed between La Plata and Riverside, Md., on the lower Potomac, and not far distant from Nanjemoy creek. Later on that stretch between Hughesville and Benedict, on the Patuxent river, will also undergo reconstruction, thus providing suitable highways between two important towns in Charles county.

At a largely attended meeting held recently in the courthouse at La Plata the topic of good roads was discussed and a decision reached in the matter. State Senator Mudd explained the object of the meeting, and Delegate Mitchell addressed the gathering, in which he outlined the plans in connection with the Riverside road. Two years ago E. Stone Posey of La Plata, when he was a member of the legislature, endeavored to build this road, but did not meet with the success he desired. It was this same road, however, that the people voted for recently. After deciding the question as to which should be the next road in the county to construct, the proposition that next faced the meeting was the financing of the same. It was pointed out that the legislature, which has just adjourned, appropriated only money enough to connect up missing links in the state roads highway system already under construction. Therefore if any more roads were to be built other means had to be adopted for securing the necessary funds for the work.

After considerable discussion it was decided to build the road under the state aid law, Charles county's share of money under this system being about \$10,000. Under this plan, in order to get the benefit of the \$10,000 from the state, a like amount had to be raised by the county. This \$10,000 could be raised by the county levying \$2.00 for the purpose at the annual levy in June, and then in January, 1917, borrow \$5,000. This method of raising money could be continued for four years, when it is expected that the road could be finally completed. It is this same plan that is to be followed during the next year in building the road from Hughesville to Benedict, the popular fishing village on the banks of the Patuxent river and where the British troops landed and marched overland to attack the capital of the nation in 1814 during the following six years the county is to levy annually \$2.00 until the loans are liquidated. In addition to the levying of the \$2.00 each year it is also planned to levy enough to meet the interest on the money borrowed each year.

### AUTOMOBILE SALES LARGE.

Shipments in March Show Gain of 11,400 Carloads Over Last Year.

NEW YORK, April 8.—Shipments of automobiles during March totaled 28,600 carloads, a gain of 11,400 over March of last year and 5,000 carloads more than the best previous monthly record in the history of the industry, according to a statement made by the National Automobile Chamber of Commerce, January and February, it was said, also made new records.

At the present rate of increase, it is estimated that the total sale of cars in 1916 will reach 1,250,000, which would be a distribution of something like one car to every eighty persons in the United States.

### INTEREST IN GOOD ROADS.

Measures Before Congressional Committees Center of Attention.

Considerable interest is being manifested throughout the country in the good roads bills now in the hands of various committees of Congress. Among those particularly interested in the construction of permanent highways is John N. Willy, a prominent automobile manufacturer, who has been a staunch supporter of the good roads movement in this country and who has contributed generously toward its advancement.

In commenting upon the subject he was enthusiastic over the progress made throughout the United States in the last few years and has given it as his opinion that the present year will break all records in the amount of good roads work accomplished.

### Recent Oldsmobile Deliveries.

Among the purchasers for the past two weeks of Oldsmobiles are the following: Robert Warfield, Dr. A. H. Staples, A. Zimmerman, Adolph Wurdeman, Charles J. Brand, Thomas Bradley, R. C. M. Burton, M. A Chalmers 6-30 five-passenger touring car was delivered yesterday to John W. Fisher, Jr.

## NEW LIGHT SIX MAKES ITS DEBUT IN WASHINGTON.

E. J. QUINN, DRIVING A WESTCOTT "SIX" TOURING CAR, ACCOMPANIED BY FRANCIS R. HURLEY.

### BIG INCREASE PREDICTED IN AUTOMOBILE TOURING

Credit Given to Improvement in Roads and the Mapping Out of Routes.

"Automobile touring covering every section of the country this year will show an increase at least double that of last year, which was a record breaker," said an official of the American Automobile Association. "Many conditions contribute to this situation, such as the large increase in ownership and the impossibility of foreign touring, although the fundamental factor lies in the enormous increase of road construction that is taking place in so many states that have heretofore neglected their highways."

"Up to last year touring was largely done by those who lived where finished road areas were well defined and understood, but the long-time and excellent work carried on by the national touring bureaus of the American Automobile Association, both at its Washington and at its New York city headquarters, came to be fully appreciated as clearing houses of touring data and knowledge. Automobile owners in every section of the United States took advantage of this condition and applied for information that covered nearly every possible route combination that could be imagined."

"In these groups were many who made their inquiry with curiosity as their incentive, and when they found that route combinations could be linked together they turned from passive inquirers to active tourists. In many instances their experiences were so superior to anything they had hoped for, and in all instances finding that automobile touring is the only way to both see and know their country, they became fixed converts to long-distance touring and spread the propaganda."

### Two Detroit Electric Sales.

A five-passenger Detroit electric brougham, duplex drive, finished in blue and upholstered in fancy cloth, has been delivered to Lawrence S. Holt. The car is equipped with white wire wheels. A four-passenger brougham finished in Brewster green, with green wire wheels and upholstered in fancy cloth, has also been delivered to Mrs. Catherine G. Hope.

### Empire Tire Agency.

The Gish garage, 17th and U streets northwest, has been appointed distributor in this vicinity for the Empire tire.

### AUTO TO EVERY EIGHTY PERSONS. RATE IN U. S.

NEW YORK, April 15.—Shipments of automobiles during March totaled 28,600 carloads, a gain of 11,400 over the March record of last year and 5,000 carloads more than the best previous monthly record in the history of the industry, according to a statement made at the meeting here of the National Automobile Chamber of Commerce.

January and February, it is said, also made new records.

At the present rate of increase it is estimated that the total sale of cars in 1916 will reach 1,250,000, which would be a distribution of something like one car to every eighty persons in the United States.

### WILL OPEN NEW QUARTERS.

Professional Chauffeurs' Association to Be Host Tomorrow Night.

The members of the Professional Chauffeurs' Association have arranged for the formal opening tomorrow night of their new quarters, 1197 14th street northwest. The new quarters comprise the two upper floors of this building and they have been fitted up for the comfort of the members of the association.

The first floor has been arranged as a library, smoking and recreation room. The office also is located on the same floor. The second floor is arranged as a large assembly room, capable of accommodating 150 people. The business meetings of the association are held in this room. A general invitation has been extended to local automobile owners and the dealers to inspect the new quarters. At the opening tomorrow night it is expected that a number of motorists will be present and make addresses to the members.

### Purchase Westcott Cars.

Among those who have purchased Westcott touring cars during the past week were Dr. Ernest M. Colvin, J. W. Williams and Fred Schacht.

## Character

A MAN'S capacities are determined by several factors, chief among which is the fiber of the stuff he is made of. Like all of Nature's most potent forces this is invisible, and being so, it secures its expression in effects and results. Competency, energy and honesty—these qualities constitute greater worth. And their development creates character.

Motor cars, too, have character. It is injected and molded by the hand of man; its presence is conspicuous when put to the test.

Maxwell Motor Cars, for example, gain character and individuality by reason of experience, care and skill with which they are made. Every operation must strengthen the final result and thus the ability to give abundant and satisfying service is correspondingly increased.

As we specialize in the manufacture of light weight, standardized automobiles, we can and do concentrate our entire attention on those details that make for better motor car character.

One chassis; five body styles

Two-Passenger Roadster . . .	\$635
Five-Passenger Touring Car . . .	655
